Date: _____

Processing Equipment for One and Two Part Resin Systems

Engineering Quotation Request

Applicator Type

- Hand Held Applicator
- Stationary Mounted Applicator
- Robot Mounted
- Other Automation Mounted

Other Requirements

Mixer (Specify Size & Type) _____
 Jobs/Hour _____ Jobs/Day _____
 Bead Diameter _____

Many variables exist in the selection of this type of equipment. Your cooperation in furnishing the information requested will aid in recommending the proper equipment for your application.

Company Name _____	Contact _____	Phone(w) _____
Address _____	E-Mail _____	Phone(m) _____
City _____	State _____	Zip _____

General Information

- Existing Method
 New Method
 Single Component
 Two Component

Material Specifications (Mixed)		
Work Life	Mins. @	°F
Cure Time	Mins. @	°F

Application Requirements		
Flow Rate	cc/Min. @	Mins./Actuation
Shot Size	cc/Shot @	Shots/Minute

Chemical Data – Each Component	Resin	Hardener
Specific gravity or density		
Viscosity (@ 70° F) CPS		
Processing Temperature		
Viscosity (Processing Temp.) CPS		
Weight Ratio (Parts per 100)		
Volumetric Ratio (Parts per 100)		
Abrasive?		
Agitation?		
Container Size		
Material Manufacturer		
Supplier Product Number		

Please attach material data sheet, if available

Description of Application

Please attach sketches or additional comments, if necessary
