

JESCO STAND MOUNTED TUBE DISPENSER

Complete with regulator, gauge, and foot operator.

Model 403-A - 3oz. or 5oz. tube

Model 412 - 12oz. tube

The JESCO Tube Dispenser has been designed for use with RTV type Silicone and eliminates squeezing the compound from the tube by hand. The original tube of RTV as you receive it from the material manufacturer is installed inside a pressure chamber and the plastic nozzle is attached to the dispenser head. Regulated air is then directed into the pressure chamber of the dispenser resulting in a collapse of the compound tube. As the tube is

- AIR POWERED
- LIGHTWEIGHT
- LOW COST
- EASY TO OPERATE
- APPLIES COMPOUND DIRECTLY FROM ORIGINAL TUBE
- LESS MATERIAL WASTE
- TIMER CONTROL — OPTIONAL

JESCO HAND HELD TUBE DISPENSER

Model 303-A - 3oz. or 5oz. tube

Model 312 - 12oz. tube

Note: Add Suffix "F" to model number to include regulator, gauge, and foot operator.

pressurized, the compound is forced from the nozzle. When the air is exhausted from the chamber, the flow stops.

Small spots or very even beads can be applied with greater uniformity than the conventional method of squeezing the tube by hand.

An electrical timer control is available for applying metered amounts.
